

### Area Rug Cleaning

In-Plant Rug Cleaning is recommended for Oriental Rugs and loose woven rugs. They should not be cleaned on location like wall to wall carpet. Esquire Services cares for the finest to the most basic rugs from around the world. We will pick your rug up and bring it to our special cleaning plant where it will receive our very thorough Nine Step Cleaning System to get maximum soil and spot removal. Having your rug cleaned in our plant allows us to give it several treatments for a more thorough cleaning, controlled drying, and the use of various tools that are not available on location.

---

#### **Step 1: Pre-Inspection and Pick Up**

We will determine as much as we possibly can about the type of rug and inherent qualities that may affect

---

#### **Step 2: Dry Soil Removal**

Woven rugs, especially hand knotted rugs are designed to hide dry soil. A few years ago, the Eureka co

---

#### **Step 3: Pre-Condition**

Depending on fiber content and soiling type, the rug will be pre-treated to emulsify the soils.

#### **Step 4: Pre-Spot and Fringe Preparation**

Any potentially difficult spots will be pre-treated with special solutions to increase chances of removal. The
